

Ahmed Mahrous

Flutter Developer

Cairo, Egypt · [01063321062](tel:01063321062) · ahmedmahrous768@gmail.com
linkedin.com/in/ahmedmahrous3255 · github.com/Ahmed-Mahrous

Flutter developer and Scrum Master with production experience across Android and iOS. Currently a software engineer at Epic Systems, where I also serve as Scrum Master, and a part-time engineer at Rafiqi on a gamified learning platform for primary-school students. Builds with Bloc, clean architecture, Firebase, and REST APIs, and uses vibe coding in Cursor and Claude to move from idea to working software quickly without dropping code quality.

EXPERIENCE

Flutter Developer · Epic Systems Full-time

Dec 2024 – Present

Zamalek, Cairo, Egypt

- Build and maintain production Flutter apps for Android and iOS across Epic's product line and client work.
- Own live-location features on TrackN for outdoor technical staff: GPS, maps, geofencing, and manager visibility.
- Ship Cashy (POS / cash-flow), CRMNT (sales CRM and call logging), QudraaTech, Espressolab EG, Adlifty digital signage, and the Family Doctor pair (patient + doctor) for the IML project.
- Integrate REST APIs, local storage, and push notifications; debug and release in Agile sprints with design and backend.

Scrum Master · Epic Systems Full-time

16 Jul 2026 – Present

Zamalek, Cairo, Egypt

- Serve as Scrum Master for the Epic Systems product team from 16 July 2026, alongside Flutter development.
- Facilitate sprint planning, daily stand-ups, reviews, and retrospectives, and keep delivery aligned with sprint goals.
- Remove impediments, protect focus time, and coordinate Flutter, design, and backend so work reaches production on cadence.
- Coach the team on Scrum practices, backlog refinement, and continuous improvement.

Flutter Developer · Rafiqi Part-time

Aug 2026 – Present

Egypt · Remote

- Part-time from 23 August 2026 on Rafiqi, a gamified learning product for primary-school students.
- Build the two Flutter apps in the Rafiqi suite: the student learning app and the teacher companion for lessons, progress, and classroom follow-up.
- Turn curriculum into games, quizzes, streaks, and rewards so kids stay in the lesson instead of bouncing off a textbook screen.

Flutter Developer Intern · Slash Hub Internship

Oct 2024 – Present

Cairo, Egypt

- Work on Slash Main and Slash Seller — Flutter e-commerce for Android, iOS, and web.
- Integrate REST APIs, apply Clean Architecture and Bloc / Cubit, and join Agile ceremonies.
- Debug, test, and keep shopper and seller flows stable across devices.

Flutter Developer · Freelance Freelance

2024 – 2024

Egypt · Remote

- Built a multi-vendor Flutter app for dogs so each dog's friends can connect — a social marketplace where pets (and their people) find each other.
- Used Bloc for state and Firebase as the backend: auth, profiles, listings, and realtime connections between dogs.

Graphic Designer · Freelance Freelance

Sep 2020 – Oct 2021

Egypt · Remote

- Designed logos, banners, and visual systems for digital products.
- Carried that craft into later Flutter work — icons, storefront imagery, and UI that is not a default Material template.

PROJECTS

QuickCart · Personal · [GitHub](#)

Self-directed e-commerce Flutter app built to practice production patterns — architecture, auth, maps, and a designed storefront rather than a tutorial clone.

Multi-vendor app for dogs · Freelance

Multi-vendor Flutter app where dogs (and their people) connect. Vendors list services and products; each dog can make friends and keep those connections in one place.

Cashy · Epic Systems · [Google Play](#) · [Product page](#)

Financial and POS Flutter client from Epic Systems: invoices, payments, inventory, and cash-flow on phone or desktop-connected workflows.

TrackN · Epic Systems · [Google Play](#) · [Product page](#)

Live-location product for outdoor technical staff. Managers see where the team is, allocate work, and respond when someone needs help.

CRMNT · Epic Systems · [Google Play](#)

Mobile CRM for sales and field teams: leads, call logging, dashboards, and follow-ups so a conversation does not disappear after the phone hangs up.

Family Doctor — Patients · IML project · Epic Systems

Patient app for the IML Family Doctor project. Patients book visits, follow their family doctor, and keep medical touchpoints on the phone.

Family Doctor — Doctors · IML project · Epic Systems

Doctor app for the same IML Family Doctor project. Clinicians see the day's list, patient context, and visit notes without opening a desktop EMR first.

QudraaTech · Qudraat · Epic Systems · [Google Play](#) · [Qudraat](#)

Kid-friendly quiz app that helps parents and educators spot a child's interest across marketing, robotics, programming, and design.

Espressolab EG · Espressolab · Epic Systems · [Google Play](#)

Flutter work for Espressolab Egypt: store-facing mobile flows for Egyptian branches — ordering, offers, and in-café experience.

Adlify · Epic Systems

Digital signage app: playlists, menus, and ads on venue screens, managed from a Flutter player and content flow.

Rafiqi Student (رفيقي) · Rafiqi

Gamified learning app for primary-school students: lessons become games, quizzes, and streaks instead of a static homework PDF.

Rafiqi Teacher (رفيقي) · Rafiqi

Companion Flutter app for teachers: assign lessons, watch class progress, and follow up on the same gamified curriculum the students play.

SKILLS

Mobile: Flutter, Dart, Android, iOS, Flutter Web, Responsive UI, Custom widgets

Architecture & state: Clean Architecture, MVVM, SOLID, OOP, Bloc, Cubit, Provider, GetX

Data & backend: REST APIs, Dio, Firebase, Cloud Firestore, Firebase Auth, SQLite, Hive, Shared Preferences

Location, CRM & media: Geolocator, Maps, Geofencing, Live location, Push notifications, Digital signage, Call-log sync

AI-assisted development: Vibe coding, Cursor, Claude, Agentic workflows, AI code review

Quality & delivery: Git & GitHub, Agile / Scrum, Scrum Master, Sprint planning, Debugging, Error handling, Localization (AR / EN)

Other: Python, C++, UI / UX, Graphic design, Gamification

EDUCATION

B.Sc. Computers and Information

Suez University · 2018 – 2022
Grade B+ · GPA 3.4

COURSES

- Complete Flutter & Dart Development Course · Udemy
- Flutter Advanced Course — Bloc and MVVM · Udemy
- Clean Architecture with MVVM in Flutter · Udemy
- Master SOLID Principles · Udemy
- Master Git & GitHub: Essential Skills for Developers · Udemy
- C++ · Udemy
- Android Development Basics with Java · 1 Million Arab Coders
- Frontend Development Track · 1 Million Arab Coders
- Visual Elements of User Interface Design · CalArts / Coursera

LANGUAGES

Arabic · Native

English · Professional working
